I wonder how much user information is in this database at colemanforsenate.com?

205mb is a lot of information...

Full blog post: [Norm Coleman Fake Website Crash Exposes Database and Email Lists](#)

This is a screenshot I captured from the website directory at 208.42.168.251 at 7:37pm 1/28/2009. I think it holds the website for Norm Coleman.

Go to [The Big Bad Database of Senator Norm Coleman](#) at wikileaks.org for downloadable databases of the financial and personal info of the contributors and supporters. The credit card info only contains the last 4 digits but the security code is there, which is illegal to store. Unencrypted doner information is also illegal, everything in this database is unencrypted. Included are personal info such as full names, addresses, email addresses, phone numbers, contribution amounts and more.

Splendid. But, IE?? WTF?

MattJhns (49 months ago)

As you can see by the above two comments, this has not yet blown over. It was revived is news around March 11th 2009. More information on this incident and commentary at the [Minnesota Independent](#). And also at the place I volunteer, citizen journalist site <http://theuptake.org/>
